Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

In response to the reply filed 10/16/2008, claims 1-12 have been cancelled; claims 13-24 are pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 13 and 14 are rejected under 35 U.S.C. 102(b) based upon a public use or sale of the invention. The article "Developing and Assembling the law School Admission Test" written by co-authors Ronald Armstrong, Dmitry Belov, and Alexander Weissman states the LSAC has used a Monte Carlo approach to the assembly of test forms for the LSAT since 2002. This method is shown on page 144 of the article under "Monte Carlo Test Assembler". This section describes the process identically to that of the above claims.

Response to Arguments

2. The affidavits submitted 06/16/2009 are sufficient to show the inventorship of the instant application. Further the affidavit of Lynda Reese is sufficient to show that the prior supplied date of the Stochastic Search was improperly cited. Based upon the new date, the art is disqualified as prior art. These responses are sufficient to overcome the prior rejections under 35 USC §102(a) and 102(f). However, the rejection of claims 13 and 14 under 35 USC §102(b) remain. "Developing and Assembling the Law School Admission Test" clearly states on page 141 that a new assembler was implemented in 2002 and later states that this assembler uses the Monte Carlo approach of at least claims 13 and 14. The applicant has not provided any evidence to support that this methodology differs from that of the currently claimed invention, nor has evidence been provided to show that the use of such was purely of

an experimental nature. Though the applicant makes general statements that such is the case (Belov affidavit, item number 6), no evidence to support these statements has been provided. As such the rejection of claims 13 and 14 has been maintained.

Allowable Subject Matter

3. Claims 15-24 are allowed.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
